October 31, 2016

To Whom It May Concern:

No Confluent Medical Technologies products contain cadmium, lead, mercury, hexavalent chromium, asbestos, natural rubber latex, polychlorinated biphenyls (PCB), polybrominated biphenyls (PBB), or polybrominated diphenyl ethers (PBDE) as stipulated by RoHS, WEEE, JAMP, JIG, JGPSSI, GADSL, or other requirements.

Because all of our products contain naturally-occurring ingredients, trace amounts of certain metals elements could theoretically be present in any of our products without our knowledge. Every known reporting requirement to date considers such potential trace element presence to not be significant in terms of this declaration. Other metal content is per product specification. Our materials are non-radioactive per NRC and IAEA regulations.

With respect to the application of REACH requirements, we can assure you that:

- We have appointed an Only Representative thereby complying with REACH requirements.
- Our products contain none of the substances on the latest candidate list of Substances of Very High Concern (SVHCs). We will continue to monitor that list as it is updated.
- Many of Confluent Medical Technologies' products are articles under REACH. These articles have no intended release, as outlined in the European chemical Agency's "Guidance on requirements for substances in articles" (RIP 3.8), and, therefore, have no registration obligation under REACH.

If I can be of further assistance, please don't hesitate to call me at (510) 683-2000.

A handwritten signature in blue ink that reads "Chuck Faris".
