May, 2021

To Whom It May Concern:

No Confluent Medical Technologies products contain cadmium, lead, mercury, hexavalent chromium, asbestos, natural rubber latex, polychlorinated biphenyls (PCB), polybrominated biphenyls (PBB), or polybrominated diphenyl ethers (PBDE) as stipulated by RoHS, WEEE, JAMP, JIG, JGPSSI, GADSL, or other requirements.

Because all of our products contain naturally-occurring ingredients, trace amounts of certain metals elements could theoretically be present in any of our products without our knowledge. Every known reporting requirement to date considers such potential trace element presence to not be significant in terms of this declaration. Other metal content is per product specification. Our materials are non-radioactive per NRC and IAEA regulations.

With respect to the application of Section 1502 of the Dodd-Frank Wall Street Reform and Consumer Protection Act Confluent Medical Technologies is fully supportive of global industry efforts to ensure responsible manufacturing processes with transparent sourcing in full accordance with the law. Confluent Medical Technologies is actively surveying our supply base to ascertain that there are no Conflict Minerals in the materials supplied to us. We expect that all our suppliers will be in compliance with Dodd-Frank regulations. Any areas of non-compliance will result in a review of our business relationship with these suppliers.

With respect to the application of REACH requirements, we can assure you that:

- We have appointed an Only Representative thereby complying with REACH requirements.
- Our products contain none of the substances on the latest candidate list of Substances of Very High Concern (SVHCs). We will continue to monitor that list as it is updated.
- Many of Confluent Medical Technologies' products are articles under REACH. These articles have no intended release, as outlined in the European chemical Agency's "Guidance on requirements for substances in articles" (RIP 3.8), and, therefore, have no registration obligation under REACH.

With respect to application of California Prop 65 requirements, our products are known to contain chemicals listed on California's Safe Drinking Water & Toxic Enforcement Act of 1986, per the list produced March 19, 2021. These are:

- Nickel and Nickel based products
- Molybdenum trioxide
- Indium tin oxide

If I can be of further assistance, please don't hesitate to call me at (510) 683-2000.

A handwritten signature in blue ink that reads "Chuck Faris".
